

2020 Virtual Meeting of the Florida Society of Neurology

Featuring:

- Neurology Overview & Updates
- The 45th Annual Course in Neuropsychology and Behavioral Neurology: Brain Mechanisms and Diseases Underlying Neuropsychological Disorders
- 2nd Annual Stroke Conference
- 14th Annual Florida Neurology Resident's & Fellow's Research Day
- EEG Workshop hosted by Dr. Selim Benbadis, M.D.

October 2-3, 2020
Hosted by "Meeting Achievements"

The Florida Society of Neurology is pleased to present the 2020 Annual Meeting of the Florida Society of Neurology. This meeting will be hosted virtually by “Meeting Achievements” from October 2-3, 2020. The program is a two day conference with fantastic educational tracks being offered. The Florida Society of Neurology is proud to have the following offerings this year:

- Neurology Overview & Updates
- The 45th Annual Course in Neuropsychology and Behavioral Neurology: Brain Mechanisms and Diseases Underlying Neuropsychological Disorders
- 2nd Annual Stroke Conference
- 14th Annual Florida Neurology Resident’s and Fellow’s Research Day
- EEG Workshop hosted by Dr. Selim Benbadis, M.D.

We are very excited about our 2020 meeting. We invite a wide range of attendees including neurologists, internists, geriatricians, emergency room physicians, neurology physician assistants, nurse practitioners, neurology physicians-in-training (residents and fellows) and other allied health professionals (nurses, speech-language pathologists, physical and occupational therapists, etc.). The program offers a little something for everybody.

LEARNING OBJECTIVES

At the conclusion of this session, participants will have received current information on a diversity of medical topics pertinent to patient care in Neurology. Subject matter was chosen based upon assessed needs, future trends and relevance to patient care. Many topics were chosen as a direct result of the evaluations from last year's program under the guidance of the planning committee for the behavioral course, the education workgroup of the Florida Society of Neurology, and the board of the Florida Society of Neurology.

At the end of the three parallel sessions:

- The Florida Neurologist will be updated in contemporary management strategies and will have gained information to avoid burnout and maintain humanism in practice.
- The Florida General Practitioner will know how to recognize, localize, and treat common neurological disorders.
- The Behavioral Specialist will be updated with the most recent research advances in the field of cognitive and behavioral neurology.
- The Florida Neurologist-In-Training will have further developed the skills of analytical thinking and appreciate the value of life-long learning, our yearly goal.
- The Stroke Conference will allow attendees to obtain additional cutting-edge knowledge regarding stroke care, including interventional case studies, information about COVID-19 and stroke, women’s health and stroke, intracranial stenosis, and wake-up stroke.
